

Garbage bags

100% home compostable & biodegradable

Medium for Under-Desk Use and Small for Bathrooms.

Our Bio Veg garbage bags come in two convenient sizes: small, perfect for bathrooms, and medium, ideal for under-desk use. Made from plant-based starch oils derived from renewable sources like corn, potatoes, or sugarcane, these bags offer an eco-friendly alternative to traditional plastic bags.

In addition to being strong and durable, Bio Veg bags are naturally compostable, requiring no industrial facility to break down. They leave behind no microplastics or petrochemical waste, making them a smart, sustainable choice for anyone looking to reduce their environmental impact without compromising on performance.

The perfect solution for your business
