

Paper cups for coffee & drinks

100% home compostable & recyclable

**Legally compliant to
the European Union
Single Use Plastic
Regulation 2019/904.**

Our cups are made from paperboard with a unique, multi-layer, non-polymer technology, designed and refined to package food and beverages, eliminating the need for PE or PLA linings.

Materials used to make paper cups are certified as.

Free of any harmful or toxic substances, including PFAS and Reach SVHC.

Certified plastic free by Flustix.

Carbon balanced by the World Land Trust.

100% Recyclable in any waste stream.

100% Compostable in both the home and industrial environments.

100% Biodegradable in marine and soil ecosystems.

**Our paper pulp also holds certification
from PEFC (the Programme for the
Endorsement of Forest Certification)**

This assures that the wood fibre used in the production process originates in forests where Sustainable Forest Management ("SFM") practices are in place maintaining the optimum balance of harvesting and replanting for forest regeneration, conserving biodiversity, and protecting the rights of forest workers.
