## DID YOU KNOW?

There's a secret behind an enduring fragrance – and that secret is well-hydrated skin. The molecules that make up your favourite fragrances bind to the oils in your skin, which makes applying a moisturising lotion key.

Our hand lotions contain glycerine, a natural humectant, which draws water into the skin, so after cleansing and refreshing hands with hand wash, simply massage the hand lotion into skin to build a layer of longer lasting, signature scent.

EAUX DE TOILETTE
